

## **YEAR 9**

### **'SOS (Save Our Soles, Reduce Your Carbon Footprint) 2024**

*This sculpture made by the Year 9's, represents our devastating climate crisis. The students all researched a climate crisis topic which they wanted to highlight. Through research and drawings, they designed their own Carbon Footprint Crisis Trainer and developed this into a 3D sculpture. We wanted to create one Art piece and combined all the Crisis Trainers to make one sculpture, as we believe we are stronger together as a collective, and feel confident that our tipping sculpture, **'SOS (Save Our Soles, Reduce Your Carbon Footprint)'** would make an impact at Trafalgar Square, and inform the thousands of people who visit there to stop and think about the dangers our planet is facing through human error, stupidity and negligence, and hopefully make people stop and think how to improve their carbon footprint.*
